DETAILED ACTION

Election/Restrictions

1. Applicant's election of 4-9 in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Response to Amendment

2. Applicant has invoked 35 U.S.C. 112 sixth paragraph for newly added claims 47-51. However claims 48-51 are not valid "means plus function" claims as they recite definite structure (See MPEP 2181 -- test C below). Accordingly claims 48-51 are not treated according to the special rules applied to "means plus function" type of claims.

A claim limitation will be interpreted to invoke 35 U.S.C. 112, sixth paragraph if it meets the following 3-prong analysis:

- (A) the claim limitations must use the phrase "means for " or "step for ";
- (B) the "means for " or "step for " must be modified by functional language;
- and
- (C) the phrase "means for " or "step for " must not be modified by sufficient structure, material or acts for achieving the specified function.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 47 is rejected under 35 U.S.C. 102(b) as being anticipated by Humphrey et al (US 5201956).

Art Unit: 1763

Humphrey et al disclose a tumble coater and disclose a cellular fixture for holding coating articles (Fig 1 and Col 3 lines 26-31). This type of structure as disclosed in Fig 1 of the specification, is inherently entanglement free.

5. Claims 47-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Christiann Mihai Van Ooy (US 3582059).

Christiann Mihai Van Ooy discloses a cylindrical spring like structure designed to hold a work (a vehicle) with closely coiled spring (Fig 1) with additional spring like structure wound on the wire of the cylindrical spring so as to help in rolling smoothly (Fig 1-10).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
